Where Homeless Students Drop Out

Note: Data are by school district and represent the 4-year dropout rate for students who entered high school in 2011 and experienced homelessness at any point during their high school career. Data do not include schools in non-geographic districts.

The four-year dropout rate for New York City improved slightly from 10% for the class of 2014 to 9% for the class of 2015, but the achievement gap persisted.

Homeless students dropped out at two times the rate of low-income housed students and over four times the rate of housed students who were not low-income (18%, 9%, and 4% respectively).

The dropout burden was not equal among students who experienced homelessness during high school. Close to one out of four (24%) students who experienced homelessness but had never been in shelter dropped out of school compared to just 12% of high school students who experienced homelessness and had been in shelter at some point during the four-year period.

In ten districts, more than one out of five students who experienced homelessness in high school dropped out—two times the citywide rate. These districts included the Lower East Side, Hunts Point, Fordham, Williamsburg, Bedford-Stuyvesant, Crown Heights, Brownsville, Woodhaven, Staten Island, and Bushwick (Districts 1, 8, 10, 14, 16, 17, 23, 27, 31, and 32).
