
Appendix

User's Guide

The *Atlas of Student Homelessness* is divided into seven sections. Section one provides an overview of homelessness among students in New York City focusing on the geographic distribution across the city. Sections two through six explore educational outcomes of homeless students, focusing on overarching citywide trends as well as how outcomes vary by type of homelessness and by school district. Section seven provides an in-depth look at student homelessness in each school district—information critical to local program planning and priority setting. Additional school-level data can be found on ICPH's Interactive Map of Student Homelessness. Definitions of all terms, as well as additional tables by community, City Council, State Assembly, and State Senate districts, are included in the Appendix.

The data for this Atlas were provided primarily by the New York City Department of Education, tabulated by the Institute for Children, Poverty, and Homelessness. Federal law entitles homeless children to certain educational rights and supports including immediate enrollment in school without the usual required documents and records, which may not be readily available. Based on their needs and district resources, homeless students receive assistance that may include school supplies, transportation, clothes, and after-school programs, as well as other supports. In New York City, schools receive technical support from the Students in Temporary Housing Unit (STH) within the Department of Education and from the New York State Technical & Education Assistance Center for Homeless Students (NYS TEACHS). Teachers and other school personnel are often the first to identify homeless children who have slipped between the cracks of the City's support systems. This "first responder" role makes schools a vitally important link for meeting the needs of homeless children and their families.¹

Citywide Maps

Citywide "heat" maps are included to enable visual comparisons across school districts. While the color of each map varies depending on the information presented, the darkest shade will generally represent the worst outcome and the lightest shade, the best outcome. Most citywide maps are accompanied by tables that enable comparison across school districts as well as by student poverty level and type of homelessness. The five groups shown in the table are: all homeless students, homeless students living in shelter, homeless students living doubled up, housed students eligible for free- or reduced-price lunch, and housed students not eligible for free- or reduced-price lunch. In graduation and late IEP data, the homelessness category "in temporary arrangement" is used to represent students who were homeless but did not live in a shelter. Eligibility for free- or reduced-price lunch is a common proxy for low-income status. In the *Atlas* text, "low-income students" is often used interchangeably with eligibility for free- or reduced-price lunch. All homeless students are automatically eligible for free- or reduced-price lunch.

New York City Department of Homeless Services, *Shelter Repair Squad Scorecard-Shelter Building Listing*, December 2015; New York City Department of Housing Preservation and Development, HPD Building, Registration, and Violation, <http://www1.nyc.gov/site/hpd/index.page>, accessed May 2016; Legal Aid Society, DHS Family Shelter Facilities, <http://www.legal-aid.org/en/civil/civilpractice/homelessright-project/materials/toc.aspx>, accessed May 2016.

Select neighborhoods and location of school district in New York City.

District-level information critical to local program planning and priority setting for educators and policymakers.

Ratio of the number of fifth graders who are currently homeless plus those who have experienced homelessness during elementary school over all fifth graders in the district.

Ratio of the number of pre-K-12 students who are currently homeless plus those who have experienced homelessness at any point during the last six years over all pre-K-12 students in the district.

Number of shelter units and shelters, including hotels and cluster sites, for families with children.

The number of units is a rough approximation of the total number of families in shelter in the school district. Because homeless students do not always live in their school district, the number of students in shelter is not necessarily related to the number of shelter units in the district.

Rankings are shown by borough and citywide, with a ranking of 1 indicating the highest percent of students who are homeless.

City School District 1 Manhattan

Lower East Side

Explore Student Homelessness by School in Your Neighborhood

Key Findings

Over 1,400 homeless students attended school in the district in SY 2015-16, including 570 students living in shelter.

District 1 homeless students had the best rate of identification of special educational needs (IEPs) of all geographic districts citywide. (39%)

Dropout Rate	23%	17%
Graduation Rate	51%	55%

Student Homelessness and Poverty

Where Homeless Students Sleep

Notes: The number of shelter units in a school district and the number of students in shelter are not the same; students may attend schools in districts where they do not live, and each shelter unit can house more than one child. Some shelters are not included due to missing or incomplete address information. See User's Guide for further notes about the family shelters included in this publication. The number of homeless students represents where students attend school; homeless students may attend schools in districts where they do not live. Ratio of elementary students who will experience homelessness by fifth grade is an estimate based on trends over the last six years; due to growing student homelessness, this is likely an underestimate. Students who experienced homelessness in the last six years is the ratio of currently homeless and formerly homeless students to the total number of students in the district. Notes on educational outcomes are listed in each section. Percentages may not add to 100% due to rounding. Dotted lines and dashes indicate missing data or data that have been redacted due to accuracy or student privacy. "In Temporary Arrangement" refers to students who were homeless living in other temporary settings, not in shelter.

Data specific to homeless students attending school within the district.

To enable comparison, educational outcomes are shown for homeless students in the district and overall homeless students in New York City.

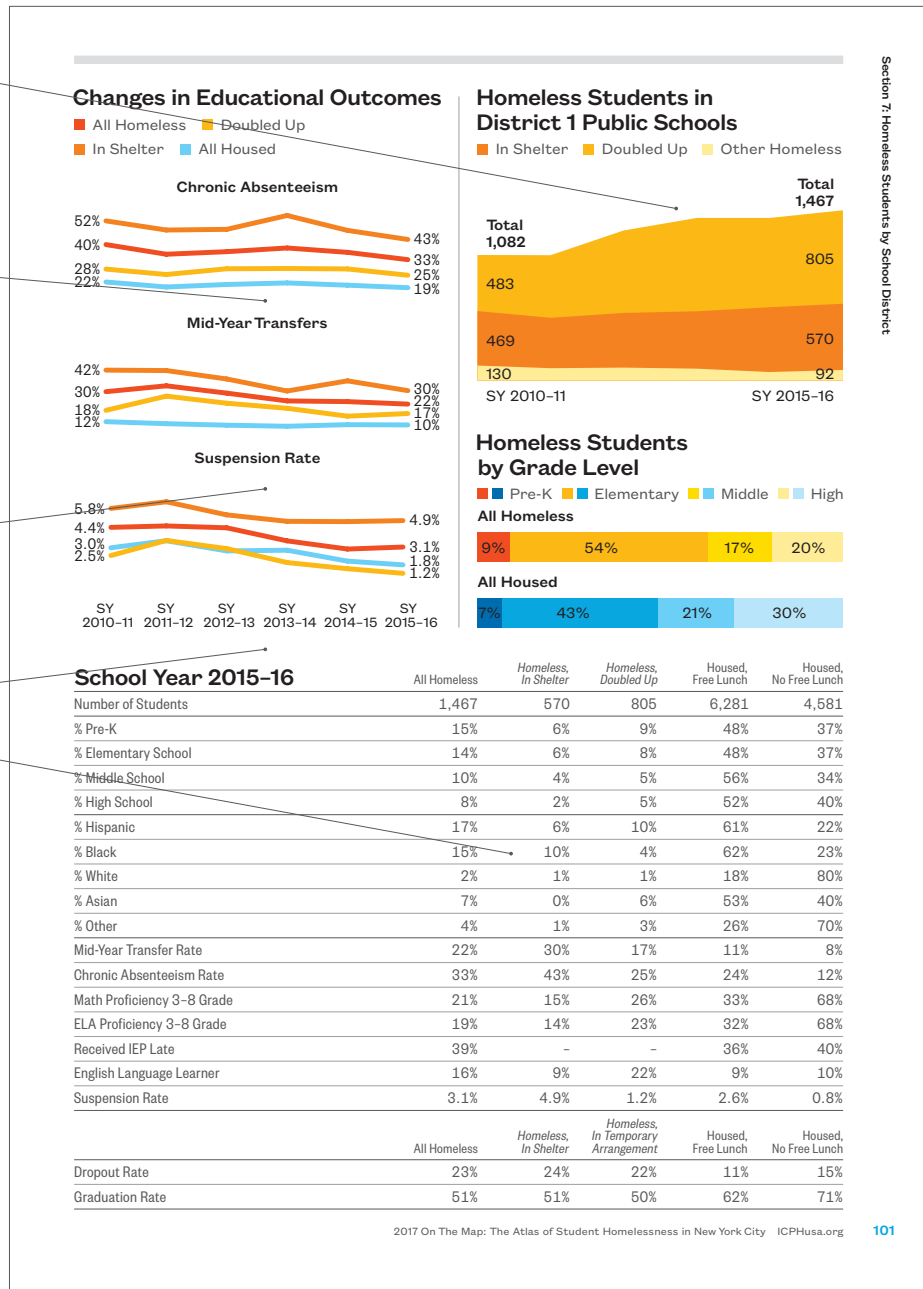

Changes over time in enrollment of homeless students in the district.

Chronic absenteeism and mid-year transfer rates over time are critical indicators of school instability for homeless students.

In light of DOE policies to reduce suspensions for all students, district trends by housing status are shown as an indicator of which districts are keeping pace with the citywide decline.

A comparison of grades homeless students attend in the district compared to housed students.

Comparison between homeless students, housed students who are low income, and housed students who are not low income within the district. Additionally, comparisons can be made by type of homelessness by examining differences between homeless students in shelter and homeless students doubled up. Eligibility for free or reduced-price lunch is used as a proxy for student poverty.

Homeless Students by School District

Note: The number of homeless students represents where students attend school; homeless students may attend schools in districts where they do not live. Ever homeless in elementary school ratio represents the number of fifth graders who are currently homeless plus those who have experienced homelessness during elementary school over all fifth graders in the district. Ever homeless (Pre-K-12) ratio is the ratio of currently homeless and formerly homeless students to the total number of students in the district. Notes on educational outcomes are listed in each section and the Glossary. Ns of fewer than 30 were redacted.

Note: The number of homeless students represents where students attend school; homeless students may attend schools in districts where they do not live. Ever homeless in elementary school ratio represents the number of fifth graders who are currently homeless plus those who have experienced homelessness during elementary school over all fifth graders in the district. Ever homeless (Pre-K-12) ratio is the ratio of currently homeless and formerly homeless students to the total number of students in the district. Notes on educational outcomes are listed in each section and the Glossary. Ns of fewer than 30 were redacted.

Glossary of Terms

Awaiting Foster Care

Students who are living in a non-permanent, transitional, or emergency out-of-home foster care placement.¹

Charter Schools (District 84)

Charter schools are public schools that operate under their own not-for-profit Boards of Trustees. The schools have a contract or charter of up to five years.² Charter schools operate within the non-geographic District 84, so the physical location of the schools can be anywhere across the city. This *Atlas of Student Homelessness* only provides data on where homeless students attend charter schools. Data on educational outcomes of homeless students in these schools are not publicly available.

Chronically Absent

Missing 20 or more days in the school year. Absences do not include days missed due to suspension or school-wide releases.

Dropout Rate (Four-Year)

The percentage of students who entered ninth grade in SY 2012–13 and left high school without graduating within four years.

Educational Outcomes

Events that take place during a student's time in school (such as graduation, dropping out, repeating a grade, chronic absenteeism, and standardized test scores) that are recognized indicators of educational challenges and successes.

Elementary School

Kindergarten through 5th grade.

English Language Arts (ELA) Test

Every year, the New York State Education Department administers a standardized test to students in 3rd through 8th grade to assess the proficiency of students across New York State in reading, writing, and comprehension.

English Language Learner (ELL)

A student who primarily speaks a language other than English at home and scores below proficient on English assessments upon entering the New York City Public School system. Students determined to be English Language Learners receive targeted instruction in English as a Second Language, Native Language Arts, and English Language Arts.

Family Homeless Shelter

Family shelters are divided into three categories (Tier II shelter, hotel, and cluster site). Most family homeless shelters receive payments from the City but are privately owned and operated. Shelter operators provide private rooms for homeless families, along with cafeteria meals, kitchen facilities, or restaurant vouchers. The level and availability of social services, including childcare and case management, at each shelter location varies greatly. In general, Tier IIs are operated by nonprofits and under contract, hotels are not operated by nonprofits and are not under contract, and cluster sites are a mix.

² New York City Department of Education, "What Are Charter Schools," schools.nyc.gov, accessed July 10, 2017.

Family Education Rights and Privacy Act (FERPA)

A federal law that protects the privacy of student education records for schools that receive applicable program funds from the U.S. Department of Education.³

Free Lunch

Students are eligible for free or reduced-price lunch if their family income is 185% of the Federal Poverty Level or less.⁴

Formerly Homeless

A student who was housed during SY 2015–16 but homeless at any point during the previous school years since SY 2010–11.

Grade-Level Proficiency

On 3rd–8th grade State English Language Arts and math assessments, scores are recorded on a 4-point scale. A score of 3 indicates that the student has achieved grade-level proficiency in the subject, while 4 indicates above-grade-level proficiency. Scores of 1 and 2 indicate a student performed well below or partially below proficiency.⁵ Although performance on assessment tests is not the only factor determining student retention, failure to pass can result in a student being retained.

Graduation Rate (Four-Year)

The percentage of students who entered ninth grade in SY 2012–13 and graduated within four years with a Local, Regents, or Advanced Regents diploma.

High School

9th through 12th grade.

⁵ New York State Education Department, “2016 Parent Score Reports,” www.nysed.gov, accessed July 10, 2017.

Homeless/All Homeless

Students who were identified as homeless at any time during school year 2015–16, regardless of the type of homeless setting. The McKinney-Vento Homeless Education Assistance Act defines a student as homeless who lacks a fixed, regular, and adequate nighttime residence.⁶ Homeless students in this *Atlas* are divided into the following subcategories:

Doubled up: The McKinney-Vento definition of “doubled up” refers to children and youths who are sharing the housing of other persons due to loss of housing, economic hardship, or a similar reason.

In Shelter: Students living in a City-funded or City-operated emergency shelter, including Tier IIs, hotels, and cluster sites. When housing status is looked at over multiple years in this *Atlas of Student Homelessness*, students in shelter include those who lived in shelter during any year.

In Temporary Arrangement: A grouped category that includes students who were identified as homeless at some point but did not live in a shelter.

Unsheltered: Students living in a space not meant for human habitation, such as in a car, on the street, or in an abandoned building.

Other: Students living in a hotel/motel outside of the City shelter system that involves payment and those awaiting foster care placement.

Other Homeless: A category that combines students who were unsheltered, living in a hotel/motel outside of the City shelter system that involves payment, and those awaiting foster care placement.

⁶ New York State Technical and Education Assistance Center for Homeless Students, “Frequently Asked Questions: Definitions/Eligibility,” accessed July 10, 2017.

Housed/All Housed

All students not identified as homeless during SY 2015–16, including both housed students eligible for free lunch and housed students not eligible for free lunch.

Housed, Low Income

Students not identified as homeless whose family income meets the threshold for receiving free or reduced-price lunch. This is a proxy for students who are poor but not homeless. When housing and poverty status are looked at over multiple years in this *Atlas*, low-income housed students include those who were always housed and had received free or reduced-price lunch during any year.

Housed, Not Low Income

Students not identified as homeless who do not receive free or reduced-price lunch. This is a proxy for students who are neither homeless nor poor. When housing and poverty status are looked at over multiple years in this *Atlas*, housed students who were not low income include those who were always housed and had never received free or reduced-price lunch.

Individual Education Plan/Program (IEP)

An Individual Education Plan is created when a student is deemed eligible for special education services through the Department of Education. This plan details the programs and services that the student will need in order to be successful in school.

Received IEP Late: Includes all special education students who received an IEP after Kindergarten. For the purposes of this report, late IEP calculations are limited to a cohort of students who entered Kindergarten and received an IEP at some point during the next four years.

Math Test

Every year, the New York State Education Department administers standardized tests to students in 3rd through 8th grade in the subjects of math and English Language Arts (ELA).

McKinney-Vento Homeless Education Assistance Act

A federal law that guarantees equal access to public education for homeless children and youth. As a part of the law, schools are required to identify and immediately register homeless children for school even if they do not have required documents, such as immunization records or proof of residence.⁷

Middle School

6th through 8th grade.

Mid-Year Transfer

Students who transfer from one school to another at any point during a school year.

New York State Technical & Education Assistance Center for Homeless Students (NYS TEACHS)

The New York State Technical Assistance Center for Homeless Students is an organization funded by the New York State Education Department. It collects data and provides services to schools and other educational agencies pertaining to homeless students and their legal rights.

Non-Geographic School Districts

While most school districts are defined by geographic boundaries in New York City, a small number of districts are defined by an area of specialization. These districts include District 75 (special education), District 79 (alternative schools and programs), and District 84 (charter schools). The physical location of the schools administered under these districts can be

⁷ U.S. Department of Education “Laws & Guidance: Part C – Homeless Education,” www2.ed.gov, accessed July 20, 2015.

anywhere across the city. Some categories in this *Atlas* are not shown for non-geographic districts due to the special nature of the districts. This *Atlas* only provides data on where homeless students attend charter schools, because data on educational outcomes of homeless students in these schools are not publicly available.

Poverty (Federal Poverty Level)

The Federal Poverty Level was first calculated to represent the minimum income an average family needed to afford food and other basic expenses. The 2016 Federal Poverty Level was \$20,160 for a family of three and \$24,300 for a family of four.⁸

Pre-K

All children who turn four before January 1 of a given school year are eligible to apply for New York City's Universal Pre-Kindergarten program. Programs are operated by both the New York City Department of Education and community-based organizations.⁹

Retention/Held Back

When a student repeats a grade one or more times. The decision to retain a student considers multiple factors and varies across grade levels but can include standardized state testing results, portfolios of students' work throughout the school year, and satisfactory completion of the required number of class credits.¹⁰

School District 75

District 75 provides citywide educational, vocational, and behavioral support programs for students who are on the autism spectrum, have significant cognitive delays, are severely emotionally challenged, sensory impaired, and/or multiply disabled. District 75's schools and programs are located at sites in the Bronx,

Brooklyn, Manhattan, Queens, Staten Island, and one site in Syosset (Nassau County, New York).¹¹ Some categories in this *Atlas of Student Homelessness* are not shown for District 75 due to lack of reporting.

School District 79

District 79 helps students under 21 years old who have experienced an interruption to their studies.¹² Some categories in this *Atlas of Student Homelessness* are not shown for District 79, because the data are not relevant to the age of the students.

Students in Temporary Housing Unit

A division within the New York City Department of Education responsible for maintaining records on all students' housing statuses and providing shelter and school-based liaisons to assist homeless families with basic educational needs.

Suspension Rate

The percentage of students who received one or more suspensions during the school year. In this report, students were counted at their final school of enrollment for SY 2015–16.¹³ (Note: when students are suspended, they are provided with an alternate school assignment and are not considered absent from school unless they do not show up for their alternate assignment.)
